Letter No AS.C 427/43 B/16-2 45 from the Mil Commr. Bcfy furnishing the information-

15) Statement flagged "Y" furnishes the details of the information called for

subject to orders

KVR 27/2 16) The total cost involved in the proposal is Rs 1,7,050 against which the existing expenditure is Rs 6,960

17) A detailed note is necessary in this case for negotiating

from 27/2/45

18) Though there is a Maternity Home in the III Dvn Bcfy, the Director of P Health formulated a scheme of starting a Maternity Home and a child welfare centre there with a view to afford relief to the women & children of the locality

19) At present the maternity services are being done at the Vanivilas Hospital, & the three Maternity Homes ~~xxxx~~ The Mil Bd before whom this proposal was placed are also agreeable to the same

20) It is proposed to include the excess

staff of the Maternity Home in the proposed new one. The cost of the scheme is estimated at Rs17,050 P.M. A sum of Rs10,000/- provided in the Budget will be utilised for the new Maternity Home & the child welfare centre to be started. The statement flagged "Y" gives the details of the cost of the scheme. It is stated that the entire cost of the scheme is recurring & that there is no non-recurring expenditure in this behalf.

21 The Chief Lady Medical Officer who was consulted in the matter has stated that the proposal of the MLA may be sanctioned subject to orders (Reference Para 17 supra).

29/3

At present, the maternity services Bangalore-city are being offered in the Vani vilasa Maternity Hospital, in the three maternity Homes maintained by the Local Body and in the local dispensaries with about 11 midwives. A certain amount of welfare work is being done. Inspite of this, the percentage of ~~maternity~~ Mortality continues to be high and it is felt that an organized maternity & child welfare service would greatly reduce the preventable loss of life of women & children. With this object in view, the Director of Public Health has formulated a scheme of starting a maternity & child welfare centre in the III Division, Bangalore-city where a maternity Homes already in existence. The scheme proposed would introduce in the city, for the first time, a regular domiciliary midwifery service whereby labour cases could be attended to in the homes by a trained and experienced staff

(23) The Bangalore city MCC have agreed to work out the scheme. The total cost of the scheme per year would amount to Rs 17,050. Towards this expenditure, the cost of the existing staff of the Maternity Home in the III Divn amting to Rs 6910/- is a would be merged. An additional recurring expenditure of Rs 10,140 would be required. The details of the establishment - existing & proposed - of the centre are mentioned in the statement flag Y.

(24) The chief Medical Officer for womens Hospitals in the State who was consulted in the matter has stated that the proposal of the Municipal Council may be sanctioned.

25) The proposal is no doubt a beneficial one from the point of view of the citizens concerned. The maternity & child welfare centre is proposed to be started in a thickly populated area in III Divn of the city having a population of 50,000. Further, the existing maternity Home will be utilized as a part & parcel of the scheme and as a demonstration centre

The expenditure involved ~~in~~ the Scheme is about Rs 17050 p.a. Normally it is recurring expenditure. The expenditure incurred in respect of the Maternity Homes is Rs 6910/-. The additional recurring expenditure is Rs 10,140

a) Several items involving recurring expenditure have been sanctioned in respect of Municipality

There is a necessity Mlty and some items have been ordered beneficial to be kept by, pending the submission of scheme and

without for the ~~report~~ report of the Special Officer who is appointed to examine the finances of the Municipality Mlty.

c) In view of the heavy recurring expenditure involved in this case, the proposal of the Municipality Mlty to start the Maternity & child welfare centre in the III

P.T.O. Division is for orders

City Municipal Offices
Bangalore, 12th April 1944

Note

Regarding the starting of a Maternity and Child Welfare Centre in III Division, Bangalore City

The proposal received from the Director of Public Health regarding the above has been approved by the Council on 19-11-43 Details of establishment charges, strength and scale of pay of the staff required for the purpose could not be clearly made out from the proposal of the Director of Public Health The Health Officer, was therefore requested to submit a detailed statement with the full particulars required He has since submitted the same From this statement it is seen that the total annual cost of the scheme comes to R 17,050/- and that a sum of R 10,010/- that is provided in the budget for the working of the existing institutions is proposed to be utilised for the maintenance of the maternity and child welfare centre to be newly started Thus the extra expenditure to be incurred on this account would be only R 7,040/- per annum

This may be placed before the Council for sanctioning the scheme as proposed by the Health Officer Further, the Red Cross Society which is paying an annual grant of R 300/- for the maintanance of the Bali Mutt Creche , will have to be requested to pay the same for the maintenance of the institution to be newly started

MATERNITY AND CHILD WELFARE SCHEME FOR A POPULATION OF 50,000 IN BANGALORE CITY

The idea of starting a Maternity and Child Welfare service in Bangalore City as a demonstration Centre for carrying on similar work in urban and rural areas of the State has been under consideration for a long time. The reason is obvious. Healthy motherhood and healthy childhood are the very foundation on which the future health of the population at large depends. Wastage of life due to preventable causes in respect of child-bearing continues to remain high, in spite of providing maternity services in the hospitals and in the maternity homes as at present constituted. Whilst epidemic diseases, in view of the sudden abnormal mortality that they cause, compel the attention of all until effective measures are taken for their control. Maternal and infant mortality far out-number the mortality caused by these epidemics, and yet they do not attract much attention because the deaths are distributed uniformly over the whole year and do not form peaks as in the case of epidemics.

In 1942, there were 1,695 infant deaths, 1,009 deaths of children from 1 to 5 years and 67 deaths of mothers at or during the 30 days after labour. The deaths among mothers, infants and toddlers constitute a large proportion of the general mortality. Of a total of 6,086 deaths registered in Bangalore City, nearly half (44.4%) was due to infant deaths and deaths among children between 1 to 5 years.

Mortality figures also show that there is a high mortality rate among women of child-bearing age, as compared with that of men of the same age group, as shown below.

P.T.O

Age Group	Males		Females.	
	Deaths	Mortality Rate	Deaths	Mortality Rate.
10-15	56	3.8	86	6.3
15-20	81	5.7	108	8.1
20-30	249	8.9	271	11.1

At present the maternity services in Bangalore City are being offered in the Vani Vilas Maternity Hospital, in three Maternity Homes, and in the local dispensaries with about 11 midwives. In 1942, the three maternity homes conducted 1,056 labour cases and the midwives attached to the dispensaries conducted 762 cases, covering only 22% of the total births. The four lady doctors and the six midwives attached to the maternity homes provide the institutional midwifery service, and the midwives of the dispensaries offer a type of domiciliary midwifery service. A certain amount of welfare work is also being done. In spite of these maternity services, the mortality continues to remain high, as compared with those of some cities in India or the Health Training Centre at Closepet. The rates in respect of Bangalore City and the Health Training Centre, Closepet in 1940-42 were as follows.

Year	Maternal Mortality		Infant mortality	
	Bangalore City	Health Training Centre, Closepet	Bangalore City	Health Training Centre, Closepet.
1940.	11.5	4.1	236.8	132.5
1941	10.5	4.9	183.0	117.0
1942	7.9	7.8	212.0	118.0

The Proposed Scheme.

Convincing evidence is available now to show that an organised Maternity and Child Welfare service would greatly reduce this preventable loss of life of women and children. The desired result can only be had when the Maternity and Child Welfare Organization provides both institutional and domiciliary midwifery services with a follow up of pregnant women from the time of conception till

till the child after delivery attains the school-going age, through antenatal, natal, post-natal and infant care and child welfare.

Such an organisation could be started in Bangalore City, taking an area, having a population of 50,000 in III Division, where a maternity home is already in existence. This maternity home will be the administrative centre for this unit of work and will continue to attend to institutional midwifery as it do now with certain modifications and improvements, while the Scheme proposed would introduce in the city: for the first time a regular domiciliary midwifery service whereby labour cases could be attended to in the homes by a staff of trained and experienced midwives, under the supervision of two Public Health Nurses and a Lady Doctor. Such of the cases as are selected at the clinics are in the homes to need hospitalisation or that require better homes for confinement will be advised accordingly and make arrangements for admission to Maternity homes or the Hospitals as the case may be. Apart from such important work as ante-natal care of the pregnant women, post-natal care, not only of the mother but also of the infant would be taken up simultaneously and each case would be followed up till the child reaches the age of 5 years. In addition to this, mothers and children clinics would be held in different sections of the area selected, by the lady doctor in charge, with the assistance of the Public Health Nurse and the midwives, at which mothers and children would be examined and minor ailments in respect of mothers and children would be attended to, and proper advise would be given in respect of both.

Personnel

The personnel would consist of one lady doctor, two public health nurses and 10 midwives for domiciliaryservice and 5 for maternity. They would serve a population of 50,000, the whole area being divide' into 10 zones of 5,000 population each. The

staff will conduct a preliminary survey and register all the expectant mothers of the area. A clinic will be held in each zone.

The Lady Doctor would be in charge of the Unit under the supervision of the City Health Officer and will conduct five clinics each week and will be in charge of the institutional midwifery service at the maternity homes. Public Health Nurse would supervise the work of five midwives and help the Lady Doctor at the five clinics a week in her area. Each Midwife would be in charge of this zone of 5,000 population. Three Midwives will be attached to the maternity home and they will work in 8 hour shifts.

Cost

The scheme would cost about Rs 5 824/- per year, excluding a non-recurring expenditure of Rs 1 600/- in the first year, as detailed below.

Amount required for the Recurring Expenditure during the next six months is Rs 2 900/-

formulated a scheme of starting a Maternity and Child welfare centre in the III Division, Bangalore City which has a population of about 5'0,000 and where a maternity home is already in existence. The scheme proposed would introduce in the city for the first time a regular domiciliary midwifery service whereby labour cases could be attended to in the homes by trained and experienced staff.

The total annual cost of the scheme comes up to Rs 1705-0-0 P.A inclusive of the cost of the existing Maternity Home viz Rs 690 as shown in the appended statement for per annum. A sum of Rs 10,000 stands provided in the Budget for the working of the existing institutions will be utilised for the maintenance of the maternity and child welfare centre to be newly started. The extra expenditure to be incurred on this account would be Rs 7040- per annum. Necessary provision has been made to meet the extra expenditure in the current years Budget of the City Municipality.

The Assistant Medical Officer, Bangalore City Municipality have at their meeting held on 16-5-43 approved of the above scheme and the proposals contained therein and have requested sanction for the same.

The Chief Medical Officer, Womens Hospitals in Mysore has also advocated for the above resolution

by recommending acceptance of

of the Bangalore city Municipality ~~shall~~ is accordingly sanctioned. Necessary provision should be made in the budget of the Bangalore city municipality for the next 4 financial years
